Projects

• Quiz Web Application
- Developed an interactive quiz web application using HTML, CSS, and JavaScript.
- The application allows users to participate in various quizzes on different topics, providing an engaging and educational experience.
- Ensured the application is fully responsive and accessible on various devices, including desktops, tablets, and smartphones.
- Questions are dynamically loaded from a database, ensuring a fresh and varied experience for users.
- The application tracks user scores and displays results at the end of each quiz.
- Implemented user authentication to allow users to save their progress and view their quiz history.
